Professional Summary

Enthusiastic and detail-oriented Computer Science graduate with a strong foundation in Javascipt , Python , and FullStack development. Completed multiple academic and personal projects using HTML, CSS, JavaScript, NodeJs , ExpressJs , MongoDb and ReactJs. Eager to apply programming knowledge, problem-solving skills, and a passion for learning to real-world software development challenges.

Technical Skills

Languages & Frameworks: JavaScript, TypeScript, Python, HTML, CSS, React.js, Next.js, Node.js, Express.js , Zustand

Databases, APIs & Tools: MongoDB, PostgreSQL, RESTful APIs, Git, GitHub, Postman, Docker, CI/CD Pipelines, AWS (basic)

Projects

Chrome Web Store(Play Store Of Website) : Github Production Ready Code
(**testing** : username : kk@test.com . password : 123456)

Group All Shortcut in One Frame , Stop things from scattering & chaos , save time

Tech Stack Used: Javascript , NodeJs , ExpressJs , ReactJs , TailWindCss , Zustand

Social Media App With Chat Bot : Github Production Ready Code

A modern social media app built with Next.js, MongoDB, and Gemini AI, allowing users to post the posts, explore smart strategy by using AI Chat Bot for more Engagement and Reach.

Tech Stack Used: Javascript ,NextJs , ReactJs , TailWindCss , MongoDb

Ai Trip Planner : Github Production Ready Code

- A modern trip planning app built with React.js, FireBase, and Gemini AI, empowering travelers — from solo adventures to group journeys. Enjoy personalized travel plans featuring budget-friendly hotel recommendations, curated points of interest, and robust secure authentication.

  Tech Stack Used: Javascript , ReactJs , TailWindCss , MongoDb , Gemini Api , PostMan

Work Experience

Mealiez — Full Stack Developer Intern Dec 2025 – Present

Startup | Mess Management Platform

- Contributed to the development of a scalable mess management platform by building end-to-end features using Supabase , Express.js, React.js, Node.js, and javascript.

- Designed and implemented RESTful API’s for core modules such as user management, subscriptions, meal tracking, and admin operations.
- Built responsive, user-friendly interfaces and integrated them seamlessly with backend services to ensure smooth data flow and real-time updates.
- Implemented secure authentication and authorization mechanisms, along with database schema design and integration.
- Optimized application performance by improving API response times, reducing unnecessary re-renders, and enhancing page load speed.
- Collaborated in a startup environment, adapting quickly to requirements, fixing production issues, and delivering features under tight timelines.
- Followed best practices for clean code, version control (Git/GitHub), and deployment workflows, ensuring maintainability and scalability.

Full Stack Developer (MERN + Next.js) May 2023 - Present

Personal Project | Learning

- Built multiple full-stack web applications using MongoDB, Express.js, React.js, Node.js, and Next.js as part of self-learning and practice.
- Developed responsive user interfaces and connected them with backend APIs for smooth data flow. Implemented authentication, database integration, and RESTful APIs to handle real-world application features.
- Improved application performance by optimizing code and ensuring fast page loading. Continuously exploring new technologies and best practices to enhance full-stack development skills.ensure transparency and user control.

Education

University of Pune, Bsc in Computer Science Jun 2023 – Apr 2026

- CGPA: 9.17/10.0
- **Coursework:** Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Web developement, Advance Data Structures and Algorithms, Image Processing
